

HEMIPEAT® RETROFIT

CARTRIDGE FOR COMPETITIVE DUST COLLECTORS

patent US 7,722,699 B2

MEDIA OPTIONS

GR — Green

Our own blend of fibers with a moisture resistant treatment for the best dust release, long filter life and high filtration efficiencies.

FR — Flame Retardant

Our own blend of fibers, chemically treated with a flame retardant.

FC - FR Carbon Impregnated

Our own blend of fibers, impregnated with carbon for static dissipation and chemically treated with a flame retardant.

SY — Synthetic

A lightweight, washable polyester media.

HemiPleat filters are rated MERV 10 and higher.

HemiPleat High Efficiency filters are available for the GR, FR, and FC media options. A microfiber synthetic melt blown laminate is applied to the surface of the base media for high filtration efficiencies and are rated MERV 16.

HemiPleat eXtreme uses our tested and proven HemiPleat technology and base media with an additional layer of direct applied nanofibers, for superior efficiency and release. All base medias are available with this technology.

Filters made with HemiPleat eXtreme media have an efficiency of 99.995% on particles 0.5 µm or larger. HemiPleat eXtreme filters are rated MERV 15.

HEMIPEAT TECHNOLOGY

What it is: Synthetic beads are applied to our media in order to achieve even and open spacing. The open pleats create topmost utilization of media area resulting in longer lasting and highly efficient filter cartridges.

What it does: Camfil APC filter cartridges with HemiPleat technology have sizable dust loading capacity and allow for maximum dust release when pulsed. These industry superior characteristics result in a cleaner, safer and lower maintenance work environment.

WE CAN FIT YOUR DUST COLLECTOR

We offer replacement upgrade cartridges to fit nearly any type of collector, including...

- American Air Filter
- MAC Equipment
- Micro-Air
- Nordson
- Donaldson Torit
- UAS/Dust-Hog
- Wheelabrator
- Steelcraft
- Clark
- CMAXX

HEMIPEAT® RETROFIT ADVANTAGE

LAB AND FIELD TESTS CONFIRM HEMIPLEAT® WILL MAKE DUST COLLECTION UNITS WORK MORE EFFICIENTLY.

LAB TESTED, CUSTOMER APPROVED

Our accelerated lab test demonstrates why HemiPleat filters last longer. When compared to the leading competitors, HemiPleat filters maintained the lowest pressure drop, resulting in the least amount of energy consumption. In-field installations of HemiPleat filters back up our lab findings. At one such customer's facility, identical dust collection systems were experiencing

short filter life with competitor filters. A new set of HemiPleat filters were installed in one system and one new set of competitor filters in the other. In this side-by-side comparison, HemiPleat filters used less energy, less compressed air, maintained a lower pressure drop, and more than lasted twice as long as the competition's.

ACCELERATED LAB TEST

LAB & FIELD TEST RESULTS: CAMFIL APC FILTERS HAVE...

- Lower pressure drop
- Better dust release
- Longer filter life

WHAT THIS MEANS TO YOU

- Less energy consumption
- Fewer filter change outs
- Saving you money

REAL-TIME FIELD TEST
